John,

The EPA has no new comments other than what was previously submitted. The ARARs identified in the December 13, 2011, requirements letter has been revised and should be included in the CAP. To demonstrate compliance with the these ARARs, HMC would need to identify specific actions to meet them. The EPA will include the same ARARs in the future ROD for OU1 and OU2. I have attached an example of ARAR tables found in a 2006 EPA ROD which identifies the ARARs and how it is addressed during remedy implementation.

I will call you to follow up on this.
