Lionel Rodriguez, Reactor Inspector (Decommissioning)
NRC Region III, DNMS, MCID

Date of Call: October 29, 2012

SUBJECT: CALL BETWEEN NRC AND LICENSEE ON STATUS OF APTUIT
LICENSE AND DECOMMISSIONING PLAN REVIEW (MAIL CONTROL
NO. 579062)

The U.S. Nuclear Regulatory Commission (NRC) Region III discussed the Aptuit, LLC Scientific Operations (Mail Control No. 579062) (licensee) Decommissioning Plan (DP) received by letter dated August 30, 2012 (ML12248A095). The NRC informed the licensee that the review team was nearing completion of the DP acceptance review and that no outstanding issues had been identified to date that would cause it to be unacceptable for full technical review.

In addition, the NRC asked that the licensee submit a license amendment request with the following:

- Confirmation that principal activities have been ceased at the site;
- A commitment to limit actions involving radioactive material to those related to decommissioning; and
- A commitment to continue to control entry to restricted areas until they are suitable for release in accordance with NRC requirements.

The NRC indicated that the license amendment request should be submitted within a short timeframe to expedite the review process for the DP. The NRC stated that initiation of the detailed technical review of the DP, if accepted, would be communicated in the cover letter containing a license amendment issuing the changes described above. The licensee was

notified that the NRC would submit requests for additional information, if applicable, associated with the full technical review on or about January of 2013.

The NRC also stated that, if the DP is found acceptable for full technical review, the licensee would be billed at full cost for the technical review of the DP as described in 10 CFR 170.31, "Schedule of Materials Fees", under table item 14.A. which states in part that byproduct material licenses and other approvals authorizing decommissioning, decontamination, reclamation, or site restoration activities under part 30 are full cost fee recoverable.

End of conversation Record. No further discussion.
