UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION III  
2443 WARRENVILLE ROAD, SUITE 210  
LISLE, ILLINOIS 60532-4352

OCT 24 2012

Helmut Grohnert  
Radiation Safety Officer  
Endress+Hauser, Inc.  
2350 Endress Place  
Greenwood, IN 46143

Dear Mr. Grohnert:

Enclosed is Amendment No. 03 to your NRC Material License No. 13-32721-01 in accordance with your request. Note that most of the major changes made to your license are printed in **bold** font. Some re-ordering of conditions may have occurred so please examine the license closely.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

**This also refers to Item 6 in your letter dated July 24, 2012, and to the telephone discussion of this item between Joseph Vavra and me on October 24, 2012.**

**We were unable to approve the request made in Item 6 of the letter dated July 24, 2012, because it wasn't clear what changes needed to be made to your existing license. Mr. Vavra agreed that he would prepare a more complete and detailed response, possibly including a "marked up" pen and ink copy of the license clearly showing the changes needing to be made.**

**In addition, Mr. Vavra described the need to amend the license for a newly approved device. It was agreed that he would include this request with the response above.**

**The written response should reference control no. 577977, be addressed to my attention at the above address, and include a currently dated and signed (by senior management) transmittal letter. We will continue our review upon receipt of this information.**

If you have any questions concerning this matter please contact me at (630) 829-9841. My fax number is (630) 515-1078. My email address is [colleen.casey@nrc.gov](mailto:colleen.casey@nrc.gov).

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

~~Official Use Only - Security-Related Information~~

The enclosed document contains sensitive security-related information.  
When separated from this cover letter this letter is uncontrolled.

H. Grohnert

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

H. Grohnert

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Colleen Carol Casey  
Materials Licensing Branch
