Hemlock Semiconductor Corporation Confidential - INTERNAL

Good Afternoon Ed,

I have received e-mails from three management personnel, and included in one is information from the gentleman who oversees Hemlock Semiconductor's security. All four (and myself) recommend leaving the letter as it stands with the word proprietary on the document. When reporting the stuck shutter to the NRC, I was trying to be complete with the information I sent to you, not knowing for sure just how much information you required. We at Hemlock Semiconductor consider the information sent to you as "Intellectual Property". We have fierce competition in our industry from the Chinese, Koreans, and Germans. I did not realize this information goes out on the Internet where the public can access it.

Being that you mentioned to me over the phone that the option is available to us to not have this information put on a public website, HSC would be appreciative if the information sent to you were not posted on a public website.

Any questions, feel free to call or e-mail me.

Thanks. Wallace  
HSC Radiation Safety Officer

Good Afternoon Ed,

I was hoping to have received by now a reply from three individuals to whom I e-mail my question regarding the use of the word proprietary.

I have received one reply. Let me hope for a reply from the other two by tomorrow. Thank you for your patience.

Wallace

Good Morning Ed,

Thank you for granting some time for me to check with my supervision regarding the word "proprietary" on the stuck shutter letter I faxed to the NRC yesterday.

Much appreciated.

Wallace
