Rob/Mark—

Good afternoon!

On November 1, 2012, based on our review of available information gathered in discussions with State, tribal, and local government agencies, FEMA has concluded that offsite radiological emergency preparedness remains adequate to provide “Reasonable Assurance “ appropriate measures can be taken to protect the health and safety of the public in the event of a radiological emergency at the Salem Hope Creek NPP . At this time, FEMA is not initiating actions to conduct a Disaster Initiated Review of offsite emergency preparedness issues within the Salem Hope Creek NPP 10-mile emergency planning zone.

Please contact me or Vanessa Quinn you have any questions or concerns.

Thank you!

Tim
