Lisle, Illinois 60532-4352

Ms. Frazier,

As requested in the telephone conversation on October 25, 2012, I have enclosed information to support our request to consolidate the Tooele Army Depot license (SUC-1391) into the Joint Munitions Command license (SUC-1380). Our initial request letter is dated September 19, 2012. The reference mail control number is 579206.

Please direct questions or comments to Mr. Kelly Crooks, (309) 782-0338, or Mr. Gary Buckrop, (309) 782-2969, electronic mail address usarmy.ria.jmc.mail.army-amc-org-jmc-amsjm-sf@mail.mil.

Sincerely,

Stephanie A. Christie
Director, Safety/Rad Waste Directorate

Enclosure

CF: TEAD, JMTE-COS / Glenna Smith

NAMING AUTHORIZED USERS: Item 1A of the SUC-1380 license identifies, for the US Army Joint Munitions Command; the Director of the Safety/Rad Waste Directorate, the radiation safety officer, and the alternate radiation safety officer. The Director provides oversight of the radiation safety program including supervision of the radiation safety officer and alternate. Currently these individuals are:

Ms. Stephanie Christie, Director Safety Rad/Waste Directorate

Mr. Kelly Crooks, Radiation Safety Officer

Mr. Gary Buckrop, Alternate Radiation Safety Officer

The SUC-1380 license is in effect at numerous Army installations. Each installation has a radiation safety officer to manage the local program. We do not name installation radiation safety officers or other authorized users in the license. To do so would require frequent license amendments due to the number of individuals involved and rate of personnel turnover. Instead, we require installations inform us when they change radiation safety officers, and we commonly review the duty appointment and training qualifications of those individuals during our on-site inspections.

CONFIRMATION OF OPERATIONS: The SUC-1391 and SUC-1380 licenses provide coverage for basic ammunition handling and logistics functions; including storage, shipping, receiving, transportation, inspection, maintenance, and demilitarization. The SUC-1380 license also provides coverage for emergency render-safe operations. Thus, Tooele Army Depot will not lose any license capability.

Individuals at Tooele Army Depot have reviewed the SUC-1380 license and application and identify no issues with respect to license coverage. The individuals at Tooele Army Depot understand they will conduct their depleted uranium ammunition operations under the SUC-1380 license after the license consolidation takes effect.

The following signatures of the radiation safety officers for both licenses show the Army request to consolidate the SUC-1391 license into the SUC-1380 license is being made in good faith and is technically sound. By signing this document, Tooele Army Depot acknowledges that the SUC-1380 license and application adequately cover all their depleted uranium ammunition logistics and handling needs.

Olegna B. Smith

Radiation Safety Officer, Tooele Army Depot

Kelly W. Crooks

Radiation Safety Officer, US Army Joint Munitions Command
