RE: Radioactive Materials License 12-12836-02E – Request for License Termination

Dear Mr. Satorius:

This letter is to request termination of NRC License No. 12-12836-02E. Distribution of byproduct material to persons exempt from the requirement for a license pursuant to 10 CFR 30.18 has been discontinued.

Since the above referenced license is only for distribution to persons exempt from licensing and we continue to be authorized for possession and use of radioactive material at our facility under our Illinois Radioactive Material License, No. IL-01109-01, we will not undergo decommissioning activities specified in 10 CFR 30.36(g).

No transfers of byproduct material have been made under 10 CFR 30.18 during the reporting period January 01, 2012 through the date of this letter. This information is provided in accordance with the material transfer reporting requirements in 10 CFR 32.20,

If you have any questions or require any additional information, please contact me at (847) 385-5649 (office) or via email: mark.szczesniak@ge.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'MSZ'.

Mark Szczesniak
Manager, Environmental Health and Safety Compliance
