(NOTE: This will be used as the Documents Title in ADAMS)

On 11/8/2012 I contacted D. Rhoe concerning the disposal of sealed sources by Numedic Global. D. Rhoe was hired by Numedic Global to leak test and package sealed sources for transfer to Eckert & Ziegler IPL. EZIPL took possession of the sources on 12/13/2011. D. Rhoe performed leak test on the sources prior to their shipment to IPL. He provided leak test results for the sources. The results indicate that 3 of the 4 sources were leak tested and did not exceed 5 nCi. D. Rhoe stated that the fourth source was part of the wipe but, unfortunately the serial number was not added to the leak test record. D. Rhoe also stated that he performed a closeout survey of the facility when he packaged the sources. Unfortunately, he did not have a copy of the results because they were given to the licensee. He did state that there was no contamination at the site. Based on the fact that there has been no activity at the site for greater than 6 months, any contamination that could have remained at the site would be decayed to background.
