**Subject:** San Onofre Nuclear Generating Station

Dear commissioners,

I am a resident of San Diego and I strongly oppose Edison's proposed re-start of the defective Unit 2 at San Onofre and request a full, transparent Adjudicatory Hearing and License Amendment process, including evidentiary hearings with sworn testimony and cross-examination which include experts independent of the NRC, Edison and the nuclear power industry. This hearing would provide assurance to me and to the other 8.4 million people of Southern California who are living within 50 miles of the crippled plant that it will not be reopened unless it is entirely safe. For maximum transparency and public engagement, this Adjudicatory Hearing should be held in Southern California.

We believe that re-start of this plant would pose a serious threat to our lives and our livelihood. Please do not fail to take our concerned seriously.

Sincerely,

Laurie Sterling Jensen
