General Comment

I live in Westchester County, NY near the Indian Point nuclear power plant. At Indian Point, spent fuel has leaked carcinogenic nuclear waste into groundwater and the Hudson River and its unfortified storage structure has been considered as a target of terrorists.

We need to address the risks of nuclear waste disposal before any U.S. nuclear plant, including Indian Point, may be licensed or re-licensed.

There is no longer any legal basis for plants like Indian Point to avoid studying the environmental impacts of long-term nuclear waste storage in fuel pools or dry storage.

This reckoning is long overdue.
