Subject: Message for NRC Chairwoman Allison Macfarlane --extend environmental scoping period

Dear Chairwoman Macfarlane,

The U.S. Nuclear Regulatory Commission (NRC) has just announced a single in-person environmental scoping hearing for November 14th, at its Rockville, Maryland headquarters, as well as two webinar-only scoping hearings (Dec. 5th & 6th), as it seeks to fulfill a court-ordered environmental assessment of its "Nuclear Waste Confidence Decision and Rule."

NRC's current deadline for public comments on its environmental scoping is January 2nd, 2013, a remarkably short time period - just over two months long, including the upcoming elections, as well as the holidays.

Is NRC is trying to rush the process, and keep public involvement to a bare minimum? The current timetable certainly makes it seem so.

Please extend the environmental scoping period. I also request that additional in-person hearings be held in communities that are living in the shadows of high-level radioactive waste storage pools and dry casks.

Thank you,

Patrick Bosold
