General Comment

I am furious at the NRC corporate coddling and misinformation provided to the public historically and presently when our voices and opinions should be heard far and wide as well as loud and clear.

I am writing to state that the comment period for this Consideration of Rules be extended to hear more comments and to allow full investigation by the public into the ramifications of this rule.

As a resident of Huntsville, Alabama in the 70's and Washington State since the mid 80's I am deeply concerned about nuclear storage and use near our communities. Until permanent safe storage methodology and sites have been identified, I believe NO further waste should be produced and temporary storage sites should be far from any populations.

For too long the poor, rural, native and other vulnerable groups have been forced to accept or bribed into letting dangerous substances inhabit their states and neighborhoods. Please be certain this does not happen.

Extend and listen carefully to the Public comments in an extended timeline.

Thank you.
