## Submitter Information

## General Comment

1. Don't Rush It.

The NRC is rushing the process, and expects to issue a draft EIS for public comment sometime in 2013. Producing a legitimate Waste Confidence Environmental Impact Statement (EIS) should take seven years.

2. Be Thorough

The NRC must resolve many technical issues including long-term waste integrity, vulnerability and deterioration; the potential for accidents; and lessons learned from Japan's devastating 2011 Fukushima Daiichi meltdown.
