General Comment

Please help reduce the risk of cancer for us, our children, and our grandchildren in this generation and for generations to come. It's time to stop making radioactive waste-there is NO safe way to store it. Hardened On-Site Storage (HOSS) is a smart, interim alternative to risky radioactive waste transport, as well as risky pool and dry cask storage. Nearly 200 environmental groups have endorsed HOSS for over a decade. High Level Radioactive Waste storage pools, as shown by the Fukushima Daiichi disaster, are very dangerous. All over the country, leaks from High Level Radioactive Waste storage pools, as well as leaking pipes are leaking into our soil, groundwater and surface water. Please protect our health!

Sincerely,
Marcia Hoodwin, M.A.
