Subject: Comanche Peak COL Chapter 19 PRA - Follow up to this morning's phone call

Don/John,

As a follow up to this morning's call, a summary of how STP handled high winds (other than tornadoes) is discussed in Section 19.4.6, "ABWR Shutdown Risk," of the STP FSAR. This section of the FSAR is public and is posted on the NRC's COL web page. Revision 8 was recently submitted and is undergoing a SUNSI review.

I will send you the RAIs next week.

Thanks,

Stephen Monarque
Lead Project Manager
