Subject: RE: Leak test on disposed sources

Tara-

I phoned RAM Services, left a message asking for a signed copy.
I will cross-check the BoL to the deleted sources later this wk.

Thanks again.

Peter,

I am looking at the paperwork you submitted for the disposal of sources. Do you have a signed copy of the Bill of Lading and any documentation that would link the sources you want removed from the license to the items listed on the Bill of Lading?

Subject: Leak test on disposed sources

Tara-

I am catching up to your emails. Sorry its taken this long.

Item A- Addition of AMP's; will have to wait until I get correspondence from the preceptors. I will resubmit the proposed AMPs at later date.

Item B- Sources Disposed

1. Leak test data for disposals.
2. Bill of Lading is "CS_137_Long_Bill..."
3. Item 6. D: Possession adjust to 1 Curie.

Item C- Cesium source to NRRON.

Thanks for the guidance. I will followup with NRRON/ECHN on the licensing matter.
