Subject: RE: inquiry concerning backup power generators

I have referred your enquiry to the Duane Arnold Energy Center (DAEC) staff with whom I routinely communicate.

To clarify your reference to two reactors, DAEC is a single unit power plant. Are you also interested in information from Kewaunee Power Station (KPS) in Wisconsin, which is also a single unit power plant? If so, I will also contact them for you.

Karl Feintuch
Project Manager for DAEC
Project Manager for KPS

Subject: inquiry concerning backup power generators
Auto forwarded by a Rule

ACE is researching sundry aspects of nuclear power plants. You are probably aware that the Fukushima power plant problems in Japan arose, in part, from the flooding of backup power generators. Please advise me whether the backup power generators for your two power plants' reactors are in watertight structures or, if not, at what height they are located. I found nothing online and NRC staff advised me that contacting the power plant's project manager would probably be the most expeditious means to obtain this information.

Thanks and I look forward to the courtesy of your reply.

ACE is a global provider of insurance products. The ERM unit is in its Corporate Actuary department.
