General Comment

With respect to JLD-ISG-2012-06, Enclosure 1, Section 3, the second paragraph of this section, last second states, "Similarly for extra-tropical storms and squalls lines (Section 3.2.2), Section 0 (ANSI/ANS-2.8-1992) and Section 3.2.2.1 (Empirical Simulation Technique) provide deterministic and combined deterministic-probabilistic surge generation approaches, respectively." Section 0 (ANSI/ANS-2.8-1992) appears to be an invalid reference.
