CON EDISON LEASES NUCLEAR FUEL CORES

The Consolidated Edison Company announced yesterday the signing of an agreement to lease two nuclear fuel cores totaling \$26.3-million from C.N.A. Nuclear Leasing, Inc., a subsidiary of the C.N.A. Financial Corporation of Chicago. This was the second major nuclear-fuel lease made by C.N.A. Nuclear Leasing in two days.

The lease covers \$9.4-million of nuclear material for use at Indian Point No. 1, a 265,000-kilowatt nuclear-power plant at Bushanan, N. Y., on the Hudson River.

Approximately \$6-million of the total has been covered by the Atomic Energy Commission, which, until Dec. 31, controlled and leased all nuclear fuel.

Under Federal law, the A.E.C. can no longer write new leases

and existing A.E.C. leases must end by June 30, 1973.

The lease will also cover a \$16.9-million fuel core for Indian Point No. 2, an 873,000-kilowatt nuclear-power plant at the same site that is under construction.

The first lease announced on Monday was for between \$24.7-million and \$30-million. It was signed with the Duquesne Light Company, the Ohio Edison Company and its subsidiary, the Pennsylvania Power Company.
