**RE: North Anna Power Station, Proposed Unit 3, Department of Army Permit No. 10-V1256/NAO-2008-2534, Submittal of Federally Listed Threatened and Endangered Species Survey Reports**

Dear Ms. Bronson:

In accordance with Special Condition 1 under Threatened and Endangered Species in Department of the Army Permit No. 10-V1256/NAO-2008-2534 issued to the North Anna Power Station Unit 3 Project on September 27, 2011, Dominion is submitting documentation that a survey for the federally listed Sensitive Joint Vetch (SJV) was conducted on August 27, 2012 at the Walkerton Landing site on the Mattaponi River. The survey results show that SJV is not present within the survey area at the Walkerton Landing site. In addition, a Submerged Aquatic Vegetation (SAV) re-survey was also conducted at the Walkerton Landing site on September 6, 2012. The SAV survey results show that there are no SAV species of concern within the survey area at the Walkerton Landing site. These results are consistent with the previous survey conducted in 2010.

If you have any questions regarding the attached survey reports, please contact Kim Lanterman at 804-273-3051 or [Kimberly.Q.Lanterman@dom.com](mailto:Kimberly.Q.Lanterman@dom.com).

Sincerely,

Robert M. Bisha  
Director
