General Comment

I'm sure you will ignore this, but here goes.

Stop making irradiated nuclear fuel. It's a really stupid way to boil water to make steam to make energy. It has NOT worked. Cut it out. How much cancer and thyroid disorders are caused by leaking pipes and "accidents." Duh.

Require HOSS, hardened on-site storage. Duh.

Do the RIGHT thing for your children, our children. Not for your politics, greed, ego or whatever else drives this madness.

And you'd better set up protocols for the hundreds of aging reactors for what...the next 24,000 years? What WERE you guys thinking, anyway? DO THE RIGHT THING PLEASE.
