Margie:

These are related to GLTS and no 665 form needs to be filled.

We have an agreement with DPC. I have a special paper I place on top of the documents for scanning.

Once they've been scanned it's sent to me and I place in correct folder related to fiscal year.

RE: SEAMAN NUCLEAR CORPORATION

Dear Dr. Bhachu:

This letter is in response to your October 5, 2012, letter regarding Registration Certificates WI-587-D-107-S & NR-0587-D-104-S, and subsequent telephone conversations. The attached lists provide the correct source manufacturer and model numbers and their associated SSD registry numbers for the sources used in the Seaman Nuclear models. Amersham reports that Amersham AMNQ1954 has been renumbered as AMN.PE5, Capsule X21 registry number MA-1059-S-240-S. We have been unable to obtain complete documentation for the 3M 4P6M source. We plan to contact the manufacturer of this source. As we obtain more information, we will provide it to your office. Thank you for your assistance and patience. Please call me at 847-965-1999 if you have any questions.

Sincerely,

Eli A. Port, CHP, CIH, P.E.

cc: Scott Seaman
