10 CFR 50 Appendix E Evacuation Time Estimate Study for Point Beach Nuclear Plant

Pursuant to Part 50.4 of Title 10 of the Code of Federal Regulations (10 CFR Part 50.4), NextEra Energy Point Beach, LLC hereby submits the evacuation time estimate study (ETE) for Point Beach Nuclear Plant (PBNP). This study is submitted in accordance with the requirements of Appendix E IV 4 to Part 50 of Title 10 of the Code of Federal Regulations.

The regulation requires the licensee to submit an updated study "within 365 days of the later of the date of the availability of the most recent decennial census data from the U.S. Census Bureau or December 23, 2011."

The PBNP ETE was developed in accordance with the federal guidance in NUREG/CR-7002 (SAND2010-0016P), "Criteria for Development of Evacuation Time Estimate Studies" published November 2011.

The enclosure contains the PBNP ETE study and the completed NUREG/CR 7002 Appendix B, Table B-1 ETE Review Criteria Checklist for the PBNP ETE.

The enclosed ETE study provides the methods used to derive, for planning purposes, the time for public evacuation. The study provides an important part of the bases for development of protective action recommendations in coordination with the applicable offsite state and local emergency response agencies.

Should you have any questions regarding this submittal, please contact Mrs. Krista Longston, Emergency Preparedness Senior Coordinator, at 920-755-6138.
