MEMORANDUM TO: Andy Imboden, Chief
Communications, Planning, and Rulemaking Branch
Waste Confidence Directorate
Office of Nuclear Material Safety and Safeguards

FROM: Sarah L. Lopas, NEPA Communications Project Manager */RA/*
Communications, Planning, and Rulemaking Branch
Waste Confidence Directorate
Office of Nuclear Material Safety and Safeguards

SUBJECT: SUMMARY OF PUBLIC SCOPING WEBINARS FOR THE
ENVIRONMENTAL IMPACT STATEMENT TO SUPPORT THE
WASTE CONFIDENCE RULEMAKING

On Wednesday, December 5, and Thursday, December 6, 2012, members of the U.S. Nuclear Regulatory Commission (NRC) staff held two public scoping webinars for the environmental impact statement (EIS) to support the update to the Waste Confidence Rule. The purpose of the scoping webinars was to allow participants to ask questions of the staff and present oral comments on the scope of the Waste Confidence EIS.

The webinars were conducted from 1 p.m. through 4 p.m. EST on December 5, 2012, and from 9 p.m. through 12 a.m. EST on December 6, 2012. Both webinars were accessible online using GoToMeeting, a web-based online meeting portal. Participants were asked to pre-register for the webinars and received instructions on accessing the webinars upon registration. A moderated teleconference line provided audio for the webinars, and participants did not need internet access to listen to and participate in the webinars. Similar to the NRC's Waste Confidence scoping meetings on November 14, 2012, both webinars began with a slide presentation by NRC staff, followed by a question-and-answer period, with the remainder of time dedicated to listening to and transcribing public comments for inclusion in the Waste Confidence environmental review docket. The staff's slide presentation is available in the NRC's Agencywide Document Management and Access System (ADAMS) under Accession No. ML12326A483. The ADAMS Public Electronic Reading Room is accessible at <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS, or who encounter problems in accessing documents located in ADAMS, should contact the NRC's Public Document Room reference staff at 1-800-397-4737, or via e-mail at pdr@nrc.gov.

Approximately 62 people participated in the December 5 daytime webinar. Of those 62 participants, 15 asked questions or presented comments. Approximately 21 people participated in the December 6 evening webinar. Of those 21 participants, 14 asked questions or presented

comments. Webinar participants included members of the public, and representatives of Federal and state agencies, industry, and public advocacy groups. A list of participants for each webinar is included as Attachment 1.

Concerns and comments discussed during the webinars included: the need for mass mailings to reach people without Internet access; the need for increased use of social media (such as Facebook) as a way to reach more people; the timing and thoroughness of the Waste Confidence environmental review; the preference for a longer scoping period; the preference for multiple regional public meetings and potential locations for draft EIS meetings; the preference for evaluating Waste Confidence on a site-specific basis rather than using a generic EIS; health effects of radiation from spent nuclear fuel; safety and security of spent nuclear fuel; impacts of severe accidents on spent fuel storage facilities, including catastrophic natural events and terrorist activities; the risk of spent fuel pool leaks and fires; the costs of storing spent nuclear fuel; spent fuel transportation impacts; the preference of storing spent nuclear fuel in hardened on-site storage systems (HOSS) instead of fuel pools; and a call for the end of licensing and re-licensing nuclear power plants.

The official transcripts for both webinars are available in ADAMS under Accession No. ML12355A174 for the December 5 webinar, and ML12355A187 for the December 6 webinar. For convenience, the staff's presentation and the webinar transcripts are also available on the Waste Confidence Directorate's website at <http://www.nrc.gov/waste/spent-fuel-storage/wcd/pub-involve.html>.
