

## *US Nuclear Regulatory Commission*

### *Selection of FY12 Special Interest Function for Analysis*

The US Nuclear Regulatory Commission (NRC) has selected Product Service Code (PSC) R799 – Support – Management: Other for further review during FY13. NRC obligated \$2,299,380.37 on contracts under this PSC during FY12. This PSC has been selected for further analysis for the following reasons:

- This PSC did not appear in NRC's Top 10 in FY11
- Technical Assistance and all Information Technology Services are being evaluated as part of NRC's strategic acquisition process, and additional analysis would be duplicative
- The other items in NRC's Top 10 PSCs for FY12 are either covered above or would not benefit from further study as part of this exercise
