Submitter Information

Name: Mary Goulet

General Comment

The issue of mining for uranium is of great importance to those of us who live in the area. Because of the severity of the possibilities we are requesting more time to study the issue.

The Supplemental Environmental Impact Statement for the Dewey-Burdock project is of overwhelming thickness. When I first looked at it I felt as if I was back in first grade looking at my first book full of symbols that held words that would open up a new world of learning and adventure. I felt overwhelmed then, but confident that I would be given the time to study and absorb the material.

Please provide us with an extension so that we will be able to make insightful comments.

Thank you for your consideration in this matter.
