## General Comment

I live in the area and the water from our well we live on and survive. With out this our home is useless. Oil and mineral companies DO NOT consider this in any evaluation. If a mistake happens the land and home owners live with it. Small children depend on this water also. These companies think a few dollars will make it right. These un-proved technologies can be tested in areas where no one lives and depends on water. Please halt this project from going any futher. Thank you for this consideration
