Subject: RE: Submission of J5645 Proposal

Thanks Lindsey. We've reviewed the proposal and request a minor revision to Section 11 - Conflict of Interest (COI) Information on page 12. A statement is included in the section that ORNL has no relationship with others that might give rise to an apparent or actual COI. However to eliminate any potential questions, could changes be made to Section 11 & a replacement page 12 forwarded to me that incorporates the following COI language approved by NRC's Office of General Counsel for other agreements.

" _____ has reviewed its current work, its work data base for planned and pending projects, and, where appropriate, work done over the past five years for DOE and other organizations in the nuclear industr and to the best of its knowledge and belief has no work in the same or similare technical area as the proposed NRC project.

Of course, if _____ does find work that is similar to the proposal, the specifics of that work would be disclosed to NRC."

Subject: Submission of J5645 Proposal

Attached please find a .pdf file of the 189 proposal for JCN J5645, as requested by the SOW dated August 5, 2009. Please accept this electronic submission in lieu of a hard copy. If additional hard copies are necessary, please respond to this email in the affirmative. Please let me know if you have any problems with the file or if you have any additional questions or concerns.

Thank you,

Lindsey D. Aloisi

NRC FORM 189 (Continued) (06-98) NRCMD 11.7	U.S. NUCLEAR REGULATORY COMMISSION DOE LABORATORY PROJECT AND COST PROPOSAL FOR NRC WORK	JOB CODE J5645 DATE 9/02/2009
International and Domestic Transportation Safety Regulatory Program Support		

A. Subcontractor/Consultant Information

Database and programming technical support may be obtained from a subcontractor (as needed).

B. Equipment Purchases

No capital equipment purchases are anticipated under this project.

C. Major Procurements

None anticipated.

10. SPECIAL FACILITIES, IF REQUIRED:

No special facilities are required for the project.

11. CONFLICT-OF-INTEREST INFORMATION:

ORNL has reviewed its current work, its work database for planned and pending projects, and, where appropriate, work done over the past five years for DOE and other organizations in the nuclear industry and to the best of its knowledge and belief has no work in the same or similar technical area as the proposed NRC project.

Of course, if ORNL does find work that is similar to the proposal, the specifics of that work would be disclosed to NRC.

The ORNL personnel listed in Section 4 perform work for industry and other Federal agencies in transportation safety areas such as package performance testing and implementation of NRC regulations. However, these personnel do not support industry or other Federal agencies in the task areas included in this proposal with the exception of Task 4. Other Federal agencies may contribute to the funding of ANSI N14 activities (Task 4) in order to ensure the committee's completion of its responsibilities.

12. CLASSIFICATION OR SENSITIVITY, IF APPLICABLE (e.g., safeguards, proprietary, other):

This work is expected to be unclassified and not sensitive.

NRC INFORMATION TECHNOLOGY SECURITY TRAINING (AUGUST 2003)

Not applicable.

13. ADDENDUM:

A. Interpretations of Statement of Work:

This form 189 is consistent with the SOW for J5645 dated August 6, 2009. No exceptions were taken to the SOW.
