Have you successfully set up the online submission process?

Although we technically don't start on a licensing action until it has been submitted through Document Control, I presented your CoC revision request at our weekly scheduling meeting yesterday (5/3), and technical reviewers are being assigned as I write this e-mail. Also, I will be out of the office all next week (5/7 thru 5/11) on a business trip, but I should be able to access e-mail if you need to communicate with me. I hope to have a kickoff meeting the week I return.

Chris

I hope to submit the documents as soon as possible. I am just setting myself up to use your online submissions system so as soon as I have figured it out it will all be submitted. The updates are due to changes we made during manufacture. Some materials were hard to source (the lead) so we had to make minor changes to the specification. Therefore the packages that are being manufactured now don't meet the current specifications of the certificate therefore in order to use these packages we require your review, and hopefully approval of these changes.

Thanks,
Sarah

Thanks for all the information you submitted. I'm trying to put a schedule together now as well as other administrative things in order to get a review team put together.

A couple of questions. First, it appears you either have or will soon submit the entire application to Document Control. If correct, by when was it will it be submitted? Second, I've heard murmurs within the office about the Missouri Research folks being anxious to get these packages. Is there anything driving your submittal other than the updates and corrections I remember reading in your letter?

Thanks, Chris

Dear Chris

I realised amongst all the documents I sent you I missed out the test report. However this is because it is a whopping 35 MB. I will be submitting the full document through the document control center but I have attached all the document text to this email. The pictures have remained the same so you can clearly see what has changed during the update of the SARP.

Kind Regards,
Sarah
