Subject: FW: J5546 Spent Fuel Transport Risk Assessment (SFTRA)
Attachments: J5546-03-External-Submit-to-NRC-rev2.pdf

Good Afternoon Robin,
NMSS is currently reviewing the attached proposal to modify a agreement with SNL. The project manager does not believe that there are any OCOI since SNL is assisting the NRC with spent fuel shipment risk assessments and the work that is being performed for others involves the RADTRAN code which is used for environmental assessments. The OCOI information is provided in section 11 of the proposal. Any guidance that you can provide regarding the work that SNL is providing for others would be greatly appreciated.

Thanks

Penny,

Attached is a modified proposal incorporating the agreed upon meetings to be hosted by SNL in Section 5.0. In addition, additional information for OCI has been added to Section 11.0.

Laura

Subject: RE: J5546 Spent Fuel Transport Risk Assessment (SFTRA)

Good Morning Laura,
Thanks for removing the outdated schedule information from section 8 of the proposal as requested by John Cook. John also mentioned that he wanted to clarify that SNL would host a meeting for the peer review group on the NUREG and would support a public meeting on the NUREG. If SNL agrees, please include this in section 5. The statement that SNL is doing work on RADTRAN and that SNL does not view this work as constituting a conflict of interest does not meet the organizational conflict of interest (OCOI) disclosure requirements of the NRC. In accordance with the NRC's OCOI disclosure requirements, which are included in each proposal request, the following must be submitted in order for the NRC to make a OCOI determination and to complete an evaluation of the proposal submitted for modifying project J5546.

1. Provide descriptions of present/planned/past work for other organizations, in the same/similar technical areas as the NRC project scope of work, e.g., (included but not limited to), NRC licensees, vendors, industry groups or research institutes that represent or are substantially comprised of nuclear utilities.
2. Provide name of the organization, dollar value, and period of performance of the work identified in 1.

Penelope,

In a phone conversation you requested additional OCI information on JCN J5546 SFTRA. The only additional information SNL has to provide regarding this work is that SNL is doing work on RADTRAN. SNL does not view this work as constituting a conflict of interest.

I have attached a modified proposal. This modification removed the out dated portion of the schedule, leaving the current schedule of remaining milestones for Task 1 (per phone conversation with John Cook, 6/25/09). In addition, in paragraph 2 of Section 11 Conflict-of-Interest, I have inserted the comment on RADTRAN work.

Please advise if you require more information.
