Doug Ammerman is the Sandia PI for this project. We'll get together and get those sent out by tomorrow.

Sorry for the delay.

Hi Barbara,
I haven't received a monthly letter status report for the subject project and would like to know who I should contact so that I can be added to the distribution list.

Thanks

Penny-

Thanks for the comments - they have been incorporated. I've deleted the kickoff meeting. No deliverables until next year. Fixed performance period end date.

-John

Hi John,

I'm attaching the sow with some suggested minor changes. You'll need to revise some of the deliverable dates. For instance, you have the date for the kick-off meeting in April but the agreement wasn't awarded until the end of May. For the deliverables that have been completed, include the dates which the action were performed and note completed with the date. You'll also need to revise the performance end date. You have deliverables listed with 2008 dates but the performance period ends in 2007.

Penny-

Attached is a revised J5546 SOW to reflect the expanded effort on Spent Fuel Transport Risk Estimates SFPO is proposing. This SOW would be an attachment to the Chairman memo you reviewed earlier, and for that reason, contains additional background and context information. Can you mark-up attached by noon tomorrow, if possible? Thanks.

-John
