**SUBJECT: SHEARON HARRIS NUCLEAR PLANT - NOTIFICATION OF INSPECTION AND
REQUEST FOR INFORMATION**

Dear Mr. Hamrick:

During the period of March 18 – 22, 2013, the U.S. Nuclear Regulatory Commission (NRC) will conduct a supplemental inspection at the Shearon Harris Nuclear Plant. The inspection will evaluate activities in the Emergency Preparedness cornerstone using NRC Inspection Procedure (IP) 95001, Supplemental Inspection for One or Two White Inputs in a Strategic Performance Area, and IP 92702 Follow-up on Traditional Enforcement Actions.

To minimize the impact to your onsite resources and to ensure a productive inspection, we have enclosed a request for documents needed for this inspection. It is important that all of these documents are up to date and complete, thereby minimizing the number of additional documents requested during the preparation and/or the onsite portions of the inspection.

We have discussed the schedule for these inspection activities with your staff and understand that our regulatory contact for this inspection will be Mr. Dave Corlett of your organization. If there are any questions about this inspection or the material requested, please contact the lead inspector, Mark Speck, at (404) 997-4759.

In accordance with 10 CFR 2.390 of the NRC Rules of Practice, a copy of this letter, and your response, if any, will be available electronically for public inspection in the NRC Public
