Subject: Amendment to License 06-05869-01

030 03790

Dear USNRC Representative:

This is a request to change the license governing the use of by-product materials as stipulated in our license number 06-05869-01. One of our tie-down conditions specifies that an emergency spill kit will be maintained in the Radiation Safety Office. Due to site contraction and other considerations, a spill kit cannot be maintained in the Radiation Safety Office. Instead, it will be maintained in the 220 research building where most if not all radioisotope use will be consolidated later this year.

If you require further discussion about this, please communicate with Mark Maiello using the contact information above. Thank you for consideration of this matter.

Sincerely,

Mark L. Maiello, Ph.D.
Radiation Safety Officer
