Subject: Freedom of Information Act Request

Pursuant to the Freedom of information Act, Scientech is requesting NRC action on the following:

Any reports or document(s) containing information of land contamination assessment which the NRC staff has completed for their discussions regarding decontamination factor (DF) in relation to BWR Mark I and II containment venting system.

Scientech is aware that the NRC has performed one such assessment using MACCS2 code as described in the SECY-12-0157 Enclosure 5b. However, I am only interested in the assessment results of land surface.

Thank you for your help in this mater.

Sincerely,
Kathey Scott
