Subject: OPPD Response to March 12, 2012, Request for Information, Enclosure 2, Recommendation 2.1, Flooding, Required Response 1, Integrated Assessment Approach

On March 12, 2012, the NRC issued Reference 2 to request Information associated with Near-Term Task Force (NTTF) Recommendation 2.1: Flooding. Requested Information, Item 2, requires an Integrated Assessment Report from plant sites whose reevaluated flooding hazard is not bounded by their current design basis.

Required Response 1 states: *Within 60 days of the date of the NRC's issuance of guidance on implementation details of the Integrated Assessment Report, including criteria for identifying vulnerabilities, submit an approach for developing an Integrated Assessment Report including criteria for identifying vulnerabilities.*

This letter provides the Omaha Public Power District's (OPPDP) 60-day response for Fort Calhoun Station (FCS).

On November 30, 2012, (Reference 3), the NRC issued the Interim Staff Guidance (ISG). OPPD will utilize the ISG to develop the NTTF, Recommendation 2.1: Flooding, Integrated Assessment Report for FCS if the reevaluated flooding hazard is not bounded by the current design basis flooding evaluation.

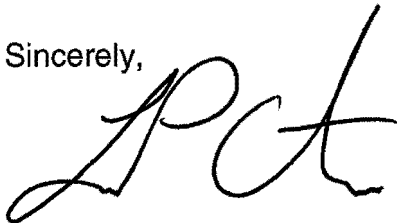

OPPD will also utilize the guidance provided by Reference 4 regarding the trigger conditions and scope of any required Integrated Assessment.

If you should you have questions, please contact Mr. Bill Hansher at (402) 533-6894.

No commitments to the NRC are contained in this letter.

I declare under penalty of perjury that the foregoing is true and correct. Executed on January 18, 2013.

Sincerely,

A handwritten signature in black ink, appearing to read 'LPC', written over a light blue horizontal line.

Louis P. Cortopassi
Site Vice President and CNO
