General Comment

I am opposed to granting any more NRC licenses enabling atomic reactors to generate high-level radioactive waste.

For wastes that already exist, I urge the NRC to require Hardened On-Site Storage.

The risks of pool fires must be considered in this EIS. The precarious situation at Fukushima is an example of something we need to take every possible precaution against.

BETTER STILL, WE SHOULD BE MOVING AWAY FROM NUCLEAR ENERGY AND TOWARD RENEWABLE GREEN ENERGY TECHNOLOGIES.

Thank you.
