Name of Licensee: CDL Nuclear Technologies, Inc

Name of Participant(s): Lon Wilson – President/RSO

Telephone No. 724-933-5570

Subject: RAI concerning the use of In Vitro kits
(NOTE: This will be used as the Documents Title in ADAMS)

In a letter dated 12/7/122, CDL requested the removal of three locations from their license. The licensee provided documentation of close out surveys that were completed in 2009 and 2010. I contacted L. Wilson to confirm that these locations had not been used by the mobile service provider since the surveys were completed. According to L. Wilson, the requested LOU had not been used in a number of years and the reason they are requesting that they be removed from the license now is because it was mentioned by the previous NRC inspector. These LOU were used by the mobile service to perform cardiac scans with unit doses. No sealed sources were kept at these facilities. In vitro kits using Tc-99m were the only in vitro kits used by the licensee. All records pertaining to the decommissioning of these sites are maintained by CDL in Wexford, PA. Based on the survey results, these LOU will be removed from the CDL license.
