License No. 20-35022-01

SUBJECT: Amended to Addendum (dated 7 Jan 2013) in support of NRC request for additional information dated 20 December, 2012.

Dear Mr. Hammann,

This updated information is based on an amended Request for Proposal (RFP) issued by the US Government on 14 January, 2013. This amended addendum is submitted to include updated requirements and source type and model information.

1. Requirements

CSMI requires a Service Provider license that is for both fixed and portable gauges, NRC License codes 03120 and 03121 – respectively and a Source re-load/exchange license 03225 in accordance with NUREG 1556, Vol. 18.

2. Additional source data

In addition to source data previously submitted, CSMI submits the following source data as outlined in the new RFP:

Rapiscan GaRDS: Sealed source Registry Nr. NGRID-1, Registration NO CA1218D102S

SAIC VACIS: Sealed Source Registry OHMART SH-F4, Series Gauge with OHMART/VEGA Model Device Numbers A-2100, A-58804, or A-60324, Registration No. OH-522-D0102-B

3. Correction to Addendum dated 7 January, 2013

In the addendum dated January 7, 2013 (question/answer #1), CSMI erroneously listed Co-60 source as the source for the SAIC Military VACIS, CA-0215-D-106-S. The Sealed Source and Device Registry (SSDR) for CA-0215-D-106-S list the source as Cs-137, with a maximum activity of 2.0 Curies. We confirm that we intended to list Cs-137 and a maximum activity of 2.0 Curies for the SAIC Military VACIS, CA-0215-D-106-S.

Additionally, we confirm that the sealed source model designation is the following:

Minnesota Mining and Manufacturing Co. Model 4F6S,
Monsanto Research Company Model 24148, or
Amersham Corporation Models CDC.700 and CDC.711m

Please feel free to contact me at any time if you have questions or need additional information at 1 (978) 989-9460.

Respectfully submitted,

Randall Kaminsky
Senior Vice President
