Subject: STP - January 9, 2013 OI Call Agenda

The following is a tentative list of items I am proposing for the January 9, 2013 OI call:

1. Fukushima RAI response – site-specific SSE and digital file provided on Jan 3, 2013
2. Staff feedback on SWMS and LWMS SSC classification in Table 3.2-1 (missing components such as piping and iso valves; presentation of the SWMS/LWMS components should be consistent with the DCD and current STP systems; and staff comments on the calculation)
3. Discrepancy between FSAR 3H.11.1 and SRP 3.3.1 on wind pressure factor (0.85 in FSAR versus 0.87 in SRP)

The RAI for Chapter 3.9.2 (RAI 6644) on flow-induced vibration will not be part of the OI call discussion. Please confirm as soon as possible if it is on Thursday (January 10), the time, and bridge-line information.

I'll add to the agenda additional items if the tech staff has any suggestion next week. Please let me know if you have any questions.

Regards

Tom Tai
