MEMORANDUM TO: Mark Henry Salley, Branch Chief
Fire Research Branch
Division of Risk Analysis
Office of Nuclear Regulatory Research

FROM: Felix Gonzalez, Contracting Officer Technical Representative */RA/*
Fire Research Branch
Division of Risk Analysis
Office of Nuclear Regulatory Research

SUBJECT: PUBLICATION OF DRAFT NUREG/CR-7114, "A FRAMEWORK
FOR LOW POWER/SHUTDOWN FIRE PRA," FOR THE
NRC/INDUSTRY TABLETOP EXERCISE

On October 18, 2012, the U.S. Nuclear Regulatory Commission (NRC) held a public meeting to discuss public comments received on NUREG/CR-7114, "A Framework for Low Power/Shutdown Fire PRA" (ADAMS Accession No. ML12310A418). As part of this meeting, industry representatives suggested that a tabletop exercise (TTE) would improve the quality of the report.

During a conference call conducted on December 17, 2012 by the NRC and industry representatives, it was agreed that the NRC and Sandia National Laboratories (SNL) should incorporate all acceptable public comments into the current draft of NUREG/CR-7114 for use in the TTE, which would maximize the TTE's benefits. It was also agreed that two plants were going to participate in the TTE.

The updated draft NUREG/CR-7114 (enclosed) will be publicly released for use in the TTE.

Please contact me if you require any additional information.

Enclosure:
As stated
