Dear Dr. Manly:

I have been asked to reply to your letter to U.S. Nuclear Regulatory Commission (NRC) Chairman Allison Macfarlane, dated December 31, 2012. Upon review of the extensive information that you provided with your request letter, we have determined that the NRC is not the appropriate Federal agency to consider the radiation protective approach being described.

We suggest that a more appropriate Federal agency recipient for your request is the Department of Health and Human Services' National Institutes of Health (NIH), which operates a Radiation and Nuclear Countermeasures Program. That program is located in NIH's Division of Allergy, Immunology, and Transplantation (DAIT) within its National Institute of Allergy and Infectious Diseases. For your convenience, the name and mailing address for the Director of the DAIT is provided, below.

Dr. Daniel Rotrosen, Director
Division of Allergy, Immunology and Transplantation
National Institute of Allergy and Infectious Diseases
National Institutes of Health
9000 Rockville Pike
Bethesda, MD 20892-6601

Your interest in enhancing safety for radiation workers is appreciated by us at NRC.

Sincerely,

/RA/

Christian Einberg, Chief
Radioactive Materials Safety Branch
Division of Materials Safety and State Agreements
Office of Federal and State Materials and
Environmental Management Programs
