**Greater Sage-Grouse: ecology and conservation of a landscape species and its habitats**

Thirty-eight federal, state,

***Read the USGS News Release***

*The USGS announced the early release of these chapters on November 4, 2009:*

*[Sage-Grouse Conservation: A Major Challenge in the West](#)*

***Presentation and Handouts used for September 29-October 1, 2009 Briefings***

*[Greater Sage-Grouse Overview \(Handout\)](#)*

*[Scientific Information for Greater Sage-Grouse and Sagebrush Habitats \(Handout\)](#)*

*[Greater Sage-Grouse: A Landscape Species and Its Habitats \(Presentation\)](#)*

university, and nongovernmental experts have collaborated to produce new scientific information about Greater Sage-Grouse populations, sagebrush habitats, and relationships among sage-grouse, sagebrush habitats, and land use. The information has been published as a scientific monograph in the series *Studies in Avian Biology* under the management of the Cooper Ornithological Society. The publisher for the monograph is the University of California Press.

Pre-release of the 25 chapters formerly available on this web site occurred under special arrangements with the authors, the Cooper Ornithological Society, and the University of California Press. Per this agreement, pre-release chapters were removed when the book was published. The book is now available from the University of California Press and many major booksellers.

The table below is your navigation aid to some of the spatial data used to create figures or tables for various chapters. New data will be added if authors contribute data sets. Some data used in chapters, such as those derived from the lek database, are proprietary and cannot be distributed by the federal government. Please contact the authors of the chapter if data you seek are not yet linked, or the State Wildlife agencies for information about sage-grouse leks.
