10 CFR 50.54(f)

ATTN: Document Control Desk
U.S. Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, MD 20852

SUBJECT:

Beaver Valley Power Station, Unit Nos. 1 and 2
Docket No. 50-334, License No. DPR-66
Docket No. 50-412, License No. NPF-73
Davis-Besse Nuclear Power Station
Docket No. 50-346, License No. NPF-3
Perry Nuclear Power Plant
Docket No. 50-440, License No. NPF-58
FENOC Response to NRC Request for Information Pursuant to 10 CFR 50.54(f)
Regarding the Flooding Aspects of Recommendation 2.1 of the Near-Term Task Force
(NTTF) Review of Insights from the Fukushima Dai-ichi Accident

On March 12, 2012, the Nuclear Regulatory Commission (NRC) issued a letter titled, "Request for Information Pursuant to Title 10 of the *Code of Federal Regulations* 50.54(f) Regarding Recommendations 2.1, 2.3, and 9.3 of the Near-Term Task Force Review of Insights from the Fukushima Dai-ichi Accident," to all power reactor licensees and holders of construction permits in active or deferred status. Enclosure 2 of the 10 CFR 50.54(f) letter contains specific requested actions, requested information, and required responses associated with Recommendation 2.1 for flooding. One of the required responses directs licensees to submit an approach for developing an Integrated Assessment Report, including criteria for identifying vulnerabilities, within 60 days of the date of the NRC's issuance of guidance on implementation details. This letter provides FENOC's 60-day response to the 10 CFR 50.54(f) letter for Beaver Valley Power Station, Unit Nos. 1 and 2 (BVPS), Davis-Besse Nuclear Power Station (DBNPS), and Perry Nuclear Power Plant (PNPP).

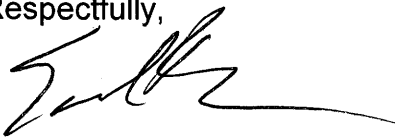

On November 30, 2012, the NRC issued the Japan Lessons-Learned Project Directorate, JLD-ISG-2012-05, "Guidance for Performing the Integrated Assessment for External Flooding, Interim Staff Guidance," Revision 0. FENOC intends to use the JLD-ISG-2012-05, Revision 0, guidance as the approach for developing the NTTF 2.1 flooding Integrated Assessment Report for those plant sites in our nuclear generating fleet where the reevaluated flooding hazard is not bounded by the current design basis flood evaluation.

FENOC also intends to use the guidance provided by NRC letter, "Trigger Conditions for Performing an Integrated Assessment and Due Date for Response," dated December 3, 2012, regarding the trigger conditions and scope of any required Integrated Assessment.

There are no regulatory commitments contained in this letter. If there are any questions or if additional information is required, please contact Mr. Thomas A. Lentz, Manager – Fleet Licensing, at 330-315-6810.

I declare under penalty of perjury that the foregoing is true and correct. Executed on January 25, 2013.

Respectfully,

Samuel L. Belcher
