Dear Nuclear Regulatory Commission:

I object to the proposed mine because:

- It would be a large risk to our groundwater, which would be polluted with radioactivity and heavy metals.
- There would be large impacts due to the huge amount of water that would be used.
- A large number of cultural and historical sites—which have not been properly studied—would be harmed.
- Bald eagles and other wildlife could be harmed by waste ponds.
- The impacts of wildfire on a uranium processing plant need to be studied.

I respectfully ask that new public hearings be held in the Black Hills, so that the public can be fully informed on the project. I also ask to be sent future information on the proposed project.

Rapid City, S.D. 57702

CITY, STATE, ZIP

Dear Nuclear Regulatory Commission:

I object to the proposed mine because:

- It would be a large risk to our groundwater, which would be polluted with radioactivity and heavy metals.
- There would be large impacts due to the huge amount of water that would be used.
- A large number of cultural and historical sites—which have not been properly studied—would be harmed.
- Bald eagles and other wildlife could be harmed by waste ponds.
- The impacts of wildfire on a uranium processing plant need to be studied.

I respectfully ask that new public hearings be held in the Black Hills, so that the public can be fully informed on the project. I also ask to be sent future information on the proposed project.
