Hello Tekia,

Thank you for the ML #'s pertaining to the November 29, 2012 Open Items meeting. I have also requested of the PDR the audio recording as you had instructed in the Summary document. Pasted below is my request to PDR.

I look forward to obtaining the audio recording of the November 29, 2012 meeting and will utilize the Slide Show and brief Summary to follow the recording.

Thank you
Michael J. Keegan
Don't Waste Michigan / Fermi 3 Intervenor

Dear PDR,
I am instructed by Tekia Govan Project Manager for Fermi 3 COLA to obtain audio recording of November 29, 2012 meeting from the PDR. Pasted below is the letter providing reference numbers for the audio recording. However I do not see the audio recording being posted to ADAMS, only reference to.

Thank you for your assistance
Michael J. Keegan

Office of New Reactors

SUBJECT: SUMMARY OF PUBLIC MEETING HELD WITH DETROIT EDISON COMPANY TO DISCUSS OPEN ITEMS AND OUTSTANDING REQUESTS FOR ADDITIONAL INFORMATION RESPONSES RELATING TO THE COMBINED LICENSE APPLICATION FOR FERMI UNIT 3

On November 29, 2012, the U.S. Nuclear Regulatory Commission (NRC) staff held a meeting in Rockville, Maryland, with members of the Detroit Edison Company (DTE). The purpose of this meeting was to discuss DTE's planned approach to respond to requests for additional information (RAI) relating to Fermi 3 site-specific soil-structure interaction (SSI) analysis and the Fukushima Near-Term Task Force Recommendation 2.1 contained in SECY12-0025.

The NRC made brief opening remarks, and introductions were made by all in attendance.

DTE then provided an overview of the materials that would be discussed during the meeting which included the topics of: Central and Eastern United States, Structures Systems and Components Modeling Evaluation; Site Specific SSI Input Development; SSI Analysis Methodology and Modeling; and the Modified Subtraction Method. DTE also provided a

submittal schedule for each of the RAIs related to these topics. The specific details of the meeting were audio recorded. A copy of the audio recorded meeting can be obtained by

contacting the NRC's Public Document Room and referencing the Agencywide Documents Access and Management System (ADAMS) Accession Number ML12362A270. The slide

presentation for this meeting can be found in ADAMS under Accession Number ML12362A415.

The enclosed documents are as follows: (1) meeting agenda; and (2) meeting attendance list.

Docket No: 52-033

Subject: RE: Second Request for NRC Recording of Public Mtg on Fermi 3 Soil Structure Analysis Open Items

Mr. Keegan:

The summary of the public meeting held with Detroit Edison Company to discuss open items and outstanding requests for additional information responses relating to the COLA for Fermi 3 can be found in ADAMS under accession number ML12362A390. The final presentation slides can be found under ADAMS accession ML12362A415.

Thanks

Tekia

Mr. Keegan:

We are currently working to get the meeting summary and audio in ADAMS. The moment that it is successfully in ADAMS it will be released to the public. I appreciate your patience as we continue to move this process forward and ensure that the material provided in ADAMS is a complete reflection of what was presented at the November 29th meeting.

Thanks
Tekia

Subject: Second Request for NRC Recording of Public Mtg on Fermi 3 Soil Structure Analysis Open Items

Tekia
Govan
December 28, 2012
Project Manager Licensing Branch 3
Division of New Reactor Licensing
Office of New Reactors

Dear Tekia Govan,

Could you please direct me to where the audio recording of the November 29, 2012 Fermi 3 Open Items meeting on Soil Structure Analysis can be found. I am unable to find this document posted in ADAMS system or at NRC webpages. Although docketed as:
<http://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber='ML12362A270'> this is

merely an acknowledgment that the meeting was audio recorded. There is no accompanying audio recording with that document. On December 4, 2012 I made this same request of you and was informed by you that the meeting summary as well as the audio will be made available later this month and that slides will be available with the meeting summary when it is issued to the public. In addition you ensured me that I would be on distribution when the meeting summary is complete.

As you are aware I requested in late October and again in November that the room be properly miked so that telephone participants could hear this very important meeting. I also requested that this meeting be recorded so that the public could review and study this important meeting. During public time on November 29, 2012 I commented about the poor quality of the public phone-line, it is my hope that the audio recording will be understandable. Thank you for providing the Draft Slide show of 11-16-2012 this was helpful but not sufficient to be able to follow comments made during the meeting.

The meeting was originally scheduled for November 1, 2012, but DTE was not prepared for that meeting and the meeting was postponed until November 29, 2012. The meeting of November 29, 2012 was virtually inaudible by phone, this resulted in the public being denied access. The fact that the NRC staff could not properly mike the room on November 29, 2012 does not lead to public confidence in the NRC.

The Atomic Safety Licensing Board requires Intervenors to file Contentions in a timely manner. The delay of audio recording release amounts to denial of access to this meeting in both real time and reasonable time. This results in obstruction of the public's ability to participate in these proceedings in a timely and meaningful manner, and certainly lacks public transparency.

Please direct me to where the audio recording of the November 29, 2012 meeting can be obtained. Please direct me to where the written meeting summary can be found. As Intervenors we again make this request in the public interest and we will continue to do so.

Thank you for your timely response
