Re: Additional Information for Control Number 579598

Dear Ms. Casey:

This response is to your request for the following:

1. Historical Review

Our historical use of this Radioactive Material License is the following.

- a. Did not use any Byproducts from 6A, 6E and/or 6F. There was no compounding of Iodine 131 and/or redistribution of used and unused molybdenum-99/technetium generators.
- b. Lakeview Diagnostic did use and transfer Byproduct materials from 6B, 6C, 6D, 6G, 6H, 6I, 6J, 6K, 6L, and 6M.

The approximate time of last use of radioactive material is September 2012. There were no spills or contaminated materials.

2. The Bill of Lading shows two different dates for shipment of sources due to 12/10/2012 being a re-print date of report. The date 10/11/2012 is the original shipment date.
3. Response for 3 and 4.
I have enclosed our Radioactive Waste Storage log of final pick-up from Stericycle and NRC Form 314 Certification of Disposition of Materials.
4. Response for 5.
Random wipes were taken on 10/12/2012. Areas wiped included floors, doorknobs, and generator/waste room counters. There was no action level detected.

If you have any questions please contact David Schmitt at (810) 650-7993 cell or (586) 466-6260 office. The fax number is (586) 466-6265.

Sincerely,

David Schmitt, R.Ph., RSO
Pharmacy Manager
