Maria,

The top rind at 19.49 cm represents the diameter of the bottom at the upper point of the taper.

The 20.00 cm line is the diameter of the bottom at the lower point of the taper.

The 22.54 cm is the outside diameter of the bottom.

The blue dashed line just represents the groove, which is at a depth equal to the bottom taper so it was shown outside of the solid line so it was visible.

The cross is just a reference to the center of the bottom.
