Jean,

Thanks for the update. I agree, we need to plan a tribal council meeting to communicate the process going forward once it has been further defined for our communication. I will do some planning to select dates in the near-term that we can align on. Thanks again and take care.....Allan

Good morning Allan,

I just wanted to keep you in the loop. I spoke with Heather yesterday, she called. She saw, via ADAMS, that we had started consultation with the state and FWS and wondered about 106 and inclusion of PIIC in the NEPA process. I let her know that the 106 letter is in process and should go out soon and that we were working on the best way to include the PIIC in the NEPA process. I also reiterated that we understood that they were in unique situation and that we did plan on including them in the NEPA process. I did not go into further details. At this time although we have discussed a path forward in our office I do not feel that it is clearly enough defined that I was prepared to committee to any course of action.

I do feel that we need to put into place a government to government meeting with the PIIC and not sure that it still makes sense to piggy back with the end of cycle meeting. The dates of this seem sufficiently uncertain that waiting may cause more difficulty than gained by waiting. I can also come out to the end of cycle if that seems useful at the time. DO you have any dates that would be good to come or avoid? Please let me know so that we can consider these as we begin to look at dates and communicate with the PIIC.

Have a great day,

Jean
