Subject: Re: Prairie Island CAP - NRC Tour of ISFSI Results in Radon Contamination

I had a follow-up call with Ron Johnson and Heather Westra of the PIIC about the radon issue and their activities on-site. The radon issue was understood by Ron and Heather and also was further explained by the licensee. The radon issue does not require any more communication on our part for the PIIC. Ron Johnson did communicate that his safety concern has now transition from the reactor to the ISFSI and cask storage. This PIIC focus will help us to be sensitive to informational needs as we support the ISFSI license renewal project.
