I have completed my review and provided the recommendations in pencil on the originals.

For all the withholdings, Ex. 2 applies. The following harm statement applies to all withholdings:

“Release would cause harm to critical infrastructure systems, the information provides a vulnerability assessment.”

No Theavy, someone needs to read the document starting “Chief Nuclear Officers ... “ and give a determination of whether it can be released to the responder. The original FOIA request is the first page after NRC Form 496A and the last two pages is the letter from Homeland Security referring the document to NRC.

Mary
